(Currently Amended) A recording medium cartridge comprising a cartridge medium and cartridge memory in a cartridge case composed by being divided into two halves, wherein said cartridge memory has a fragile portion partially formed therein, one side bordered on the fragile portion is fixed to ~~the other side of~~ one of said two halves, and the other side is fixed to the other of said two halves.
2. (Original): A recording medium cartridge according to claim 1, wherein said fragile portion is a cut-off line composed by fine holes being arrayed.
3. (Original) A recording medium cartridge according to claim 1, wherein said fragile portion is composed of material with lower strength for other portions.
4. (Original) A recording medium cartridge according to claim 1, wherein said fragile portion is formed at an approximately center of lateral direction of said cartridge memory along a longitudinal direction.

5. (Original) A recording medium cartridge according to claim 1, wherein said fragile portion is formed at an approximately center of a longitudinal direction of said cartridge memory along a lateral direction.

6. (Original) A recording medium cartridge having an IC chip and antenna according to claim 1, wherein said fragile portion cuts across both the IC chip and antenna.

7. (Original) A recording medium cartridge according to claim 1, wherein said cartridge memory communicates data with no contact.

8. (Currently Amended) A recording medium cartridge according to claim 1, wherein said cartridge memory is fixed to each half with an adhesive.

9. (Original) A recording medium cartridge according to claim 1, wherein said cartridge memory is fixed to each half by caulking.

10. (Original) A recording medium cartridge according to claim 2, wherein said fragile portion is formed at an approximately center of a lateral direction of said cartridge memory along a longitudinal direction.

11. (Original) A recording medium cartridge according to claim 2, wherein said fragile portion is formed at an approximately center of a longitudinal direction of said cartridge memory along a lateral direction.

12. (Original) A recording medium cartridge according to claim 3, wherein said fragile portion is formed at an approximately center of a lateral direction of said cartridge memory along a longitudinal direction.

13. (Original) A recording medium cartridge according to claim 3, wherein said fragile portion is formed at an approximately center of a longitudinal direction of said cartridge memory along a lateral direction.

14. (Original) A recording medium cartridge according to claim 1, wherein said recording medium is a magnetic tape.

15. (Original) A recording medium cartridge according to claim 2, wherein said recording medium is a magnetic tape.

16. (Original) A recording medium cartridge according to claim 3, wherein said recording medium is a magnetic tape.

17. (Original) A recording medium cartridge according to claim 1, wherein said recording medium is an optical recording disk.

18. (Original) A recording medium cartridge according to claim 2, wherein said recording medium is an optical recording disk.
